PROFESSIONAL SUMMARY

Second-year B.Tech Computer Science Engineering (AI & ML with Data Analytics) student at Karnavati University with hands-on experience designing and deploying five machine learning and full-stack projects spanning computer vision, predictive modeling, and cloud-based systems. Proficient in Python, Java, C++, and Google Cloud, with active participation across multiple national and institutional hackathons. Seeking a Data Analytics / AI-ML internship to apply technical and analytical skills to real-world problems.

EDUCATION

B.Tech in Computer Science Engineering (Artificial Intelligence & Machine Learning with Data Analytics)

Karnavati University, Ahmedabad | Expected Graduation: 2029
Currently in 2nd Year, 3rd Semester | CGPA: 8.25 / 10 (Sem 1: 7.7, Sem 2: 8.8)

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, HTML, CSS
Libraries & Frameworks: Pandas, NumPy, Scikit-learn, Flask
Tools & Platforms: Git & GitHub, Google Cloud, PostgreSQL, MySQL, Tableau, Power BI, Jupyter Notebook, LLM Tools (ChatGPT, Claude), VS Code, Figma
Core Concepts: Machine Learning, Supervised Learning, Retrieval-Augmented Generation (RAG), Data Analysis, Data Structures

PROJECTS

AI Exam Proctoring System | Python, HTML, CSS, JavaScript

- Engineered a computer vision-based exam monitoring system to detect focus loss, distraction, and phone usage in real time, strengthening academic integrity during online exams.

University Event Registration System | HTML, CSS, JavaScript, Python, Google Cloud

- Architected and deployed a full-stack event management platform with real-time seat tracking, secure user authentication, and an admin dashboard to streamline university event registration.

Used Car Price Prediction | Python, Flask, Scikit-learn

- Built and deployed an ML-powered web application using regression algorithms to predict used car prices, integrating a Flask backend with an interactive frontend.

CreditWise Loan System | Python, KNN, Logistic Regression, Naive Bayes

- Engineered an end-to-end supervised ML pipeline (KNN, Logistic Regression, Naive Bayes) to predict loan approval; applied EDA and feature engineering, evaluating binary classification performance using Precision, Recall, and F1-score.

Code Review Agent | Python

- Developed a Python-based automated code review tool that analyzes code quality and recommends improvements for cleaner, more efficient code.

ACHIEVEMENTS

- Smart India Hackathon (SIH) 2025 — September 10, 2025
- Google Cloud HackSprint (Digital Campus on Google Cloud) — October 14, 2025
- 36-Hour Hackathon (UIT x KIIF) — March 23, 2026
- HackBaroda (Organized by Coders Corner) — June 7, 2026

Active learner in Data Science, AI/ML, and Competitive Programming.

CERTIFICATIONS

Hackathon Certificates

- Smart India Hackathon (SIH) 2025 — Ministry of Education, AICTE, Government of India — Certificate of Participation (Sep 10, 2025)
- Digital Campus on Google Cloud #HackSprint — Google Cloud x UIT x Karnavati University — Certificate of Participation (Oct 14, 2025)
- 36-Hour Hackathon (UIT x KIIF) — March 23, 2026
- HackBaroda (Organized by Coders Corner) — June 7, 2026

Other Certifications

- Python 101 for Data Science — IBM / Cognitive Class (Feb 2026)
- Data Structures in C++ (Certificate of Excellence) — Scaler Topics (Feb 2026)
- Web Development for Beginners — Simplilearn SkillUp (Mar 2026)
- Getting Python Interview Ready — Simplilearn SkillUp (Sep 2025)
- Introduction to C++ — Simplilearn SkillUp (Sep 2025)

STRENGTHS

Problem Solving • Fast Learner • Teamwork • Communication • Analytical Thinking
